15th July 2010

Stamford, CT / USA – SIX Telekurs has announced its collaboration with The NASDAQ OMX Group to globally disseminate index and exchange-traded fund (ETF) data.

In response to the growing need for transparency and supplier diversity, SIX Telekurs and NASDAQ OMX have established the infrastructure to publish and broadly disseminate ETF and index values for some of the world's most well known issuers and index providers.

Using the thousands of NASDAQ OMX redistributors, these issuers and index providers have more access to a vast and versatile ETF and index marketplace.

"We are very pleased to work with NASDAQ OMX, and to expand our index and ETF services to the global issuers that rely heavily on its expertise and market leadership", said Barry Raskin, Managing Director of SIX Telekurs USA. "NASDAQ OMX is highly regarded for its leadership in this market segment, and we are delighted to be working with such a great team to offer our mutual customers the diversity they require."

Using the practice-proven technology developed by sister company Rolotec AG, SIX Telekurs disseminates real-time values for a wide variety of ETFs and indices, including those based on international equities and fixed income, to name just a few.

"As a premier, full-service data provider, NASDAQ OMX is committed to delivering the best possible experience to our customers. Working with SIX Telekurs is part of delivering on that promise," said Randall Hopkins, Senior Vice President of NASDAQ OMX. "SIX Telekurs offers a full-service, high quality service that gives our mutual customers a real choice in suppliers, and we're happy to have them on board."
