7<sup>th</sup> February 2011

**London, United Kingdom – JSM Wireless have chosen SIX Telekurs as a primary data source to deliver real-time financial data to their mobile application 'Blue™'.**

SIX Telekurs leveraged their web services technology in partnership with sister company Rolotec to enable real-time delivery of pricing data to a mobile device running the Blue™ application. The application, for non-professional users only, has been specially developed to allow automated permissioning thereby entitling the user with access to pricing information from specific sources within seconds.

Sulim Malook, CEO of JSM Wireless comments, "Blue™ is the leading provider of white label mobile market data applications globally – so when we went to the market to source our data, content, timeliness and accuracy were of prime importance to us. SIX Telekurs not only provides us with this but their forward use of technology complements our own brand ethos."

Martin Cole, Managing Director of SIX Telekurs U.K. Ltd adds, "Our technology combined with the breadth and depth of our data has helped JSM Wireless offer their clients access to over two million streaming prices in the palm of their hand. The development of this technology was crucial to the uniqueness of the end product and SIX Telekurs is very pleased to be working with JSM Wireless on this exciting project".

### **Rolotec**

In the multi-faceted world of software development, Rolotec has specialised in developing tailor-made financial software for the past 25 years. Rolotec was founded in 1985 and is headquartered in Biel, Switzerland. As part of SIX Group, Rolotec focuses on Switzerland as a financial centre, as well as on those markets in which SIX Group companies are active.

Rolotec provides customized solutions, ranging from data interfaces right through to client-specific systems for the interplay of data, processes and software. We offer straight-through processing refined and perfected to the customers benefit.

Rolotec's main areas of activity fall under the following categories: Display Solutions, Realtime Calculation Solutions, Reference Data Based Solutions, Trading & Portfolio Management, Compliance & Risk Solutions and Operation & Hosting. The range of our customized solutions is without bounds. In short, Rolotec analyzes business needs, examines all available options, presents possible solutions, and implements the chosen software solution which perfectly matches the needs of the customer in question.
