5 July 2010

Zurich, Switzerland – SIX Telekurs and Teleinvest International AG have signed an agreement to intensify joint sales and marketing efforts, particularly by combining their respective offers in front office applications. Teleinvest International is a well known provider of electronic trading systems. SIX Telekurs extends its comprehensive global data offering by teaming up with expert partners to offer clients value-added solutions.

SIX Telekurs and Teleinvest International look back on a long history of fruitful collaboration that goes back to the 1990s, mainly in the areas of back office securities data supply and integration services. Clients of both companies have benefited from tailor-made solutions including products and services like VDF and VALOS respectively.

The new business partner agreement aims at improving the access to data. The recently launched 'market depth' feature on Teleinvest International's Predator, based on SIX Telekurs' real-time data covering worldwide exchanges and other market venues is one example for making clients the use of the relevant data even more convenient.

Markus Benz, Head Global Partner Business at SIX Telekurs, comments: "The combination of our comprehensive securities data offering and Teleinvest International's robust trading applications is a perfect fit. We are happy to further intensify our longstanding collaboration with Teleinvest International and to offer more added value to existing and new clients through a focused joint approach."

"Our unique technology has proven reliable in the trading rooms over many years", adds Joseph Kuettel, Director Marketing & Sales at Teleinvest International. "SIX Telekurs' presence in 23 countries will allow us to expand our business to the mutual benefit of both partners."
